

ALL AROUND VALVE PARTNER SERIES

SAMSON ROTARY PLUG - RESILIENT BY DESIGN

The **SAMSON Vetec Rotary Plug Valve** is engineered for general-process and severe-service control - a double-eccentric design with the highest CV in its class, 200:1 rangeability, and clog-resistant dynamics built for fouling service. Available in face-to-face dimensions that match **ball, globe, and rotary plug valves alike** - a drop-in upgrade for nearly any control footprint, including locations currently served by a Camflex, Maxpro4, or other legacy valve.

200:1

RANGEABILITY

Accurate control engineered with high quality turndown and resolution.

CV 1100

HIGH FLOW CAPACITY

The highest rotary plug valve flow coefficient in the industry, designed with no dead spaces and a straight through flow path.

SEVERE SERVICE

BUILT TO OUTLAST

Low emissions packing with a temperature range of -320 F to 1020 F with Class V/VI shutoff.

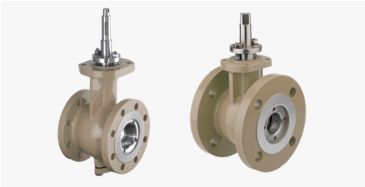

FRICTION FREE

DOUBLE ECCENTRIC DESIGN

Eliminating friction reduces wear on internal parts, and tightens control by minimizing actuator torque required.

THE VETEC LINEUP

STABLE CONTROL WITHOUT COMPROMISE

TYPE 62.7 / 82.7

CLASS 150 - 300 PRESSURE RATING

SERVICE

General Process · Modulating

- Comprehensive sealing of all bearing bushings
- Designed for most process media - gases / steams / liquids / solids / slurries
- Primary model for displacing Masonline Camflex & Flowserve Maxpro4

TYPE 72.3

CLASS 150 - 300 PRESSURE RATING

SERVICE

General Process · Modulating

- Same face-to-face dimensions as a standard globe control valve.
- Cryogenic and high-temperature options.
- Precise control when paired with SAMSON diaphragm actuators.

TYPE 73.7

CLASS 600 - 2500 PRESSURE RATING

SERVICE

Severe Process · High Pressure

- Ceramic and carbide-metal protective sleeves available for abrasive duty
- Several low-noise and anti-cavitation options available.
- Blow-out-proof shaft and double guide bushing — built for severe duty

HIGHER CV · CLEANER ACTION · SAME FOOTPRINT

VETEC DISPLACES CAMFLEX & MAXPRO4 - FLANGE-TO-FLANGE, BETTER DYNAMICS

BUILT FOR YOUR PROCESS · BACKED BY MMS

SAMSON ASP REPAIR · DES MOINES

MMS is SAMSON's **Authorized Service Provider** in the Central U.S. Factory certified valve repair, calibration, and rebuild in our shop.

LOCAL STOCK · FAST LEAD TIMES

Our Des Moines warehouse holds VETEC bodies, trim kits, and spare bearings. **Same-day quote** on most replacements

HEAT JACKETS · STEAM INJECTION

Welded-on **heat jackets** for solidifying media; **steam injection ports** at plug + seat for in-service cleaning.

DOUBLE PACKING + TEST PORT

Double packing with test port for fugitive-emission monitoring - ISO 15848 compliant when paired with low emission packing.

READY TO SPEC? LET'S WALK YOUR PLANT.

Free Valve Walkdown - an MMS technician walks your facility, identifies failing or oversized actuators, and quotes Max-Air upgrades from regional stock.
